

# SYNERGIE Fund World High Yield Bonds Hedged CHF

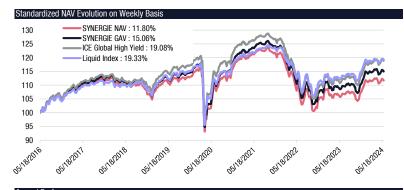

#### Main Characteristics

The investment objective of the Synergie High Yield sub-fund is to provide investors with a total return, taking into account both capital and income returns, which reflects the return of the ICE BofA Merrill Lynch Global High Yield CHF Hedged Index. In order to achieve this investment objective and due to the large diversification of the benchmark index, the investment policy of the Fund is based on a rigorous sampling approach, aimed to closely align the principal portfolio risk factors with those of the benchmark. The global control of portfolio risk is achieved using quantitative process centered on a spread maximization procedure that takes into account multiple constraints derived from the benchmark including the process centered on a spread maximization procedure that takes into account multiple constraints derived from the
